Mechanical Equipment Maintenance

TOO MUCH - **WASTES MONEY**

TOO LITTLE - **COSTS MONEY**

Harness the power of the Internet and bring balance to your mechanical equipment maintenance program.

INTRODUCING THE 24/7 WEB TECHNICIAN

The 24/7 Web Technician is the first affordable mechanical system monitoring and notification solution. It monitors critical mechanical system components and notifies management and service techs by email, text message or phone call whenever a system failure occurs.

PERFECT FOR APARTMENTS AND CONDOMINIUMS

It can take months for tenants to report a mechanical system problem. In that amount of time, a minor repair can turn into a major catastrophe. For pennies a day you receive all the benefits of having a live mechanical system operator on staff at a fraction of the cost.

NOT JUST ANOTHER PRETTY FACE

While monitoring your facility, the 24/7 Web Technician learns how the building operates and logs any anomalies. Once it gains enough experience in your facility it will predict when and where the next system failure will occur. This gives you ample time to correct potential problems before they occur. It's like having a seasoned professional looking after your buildings.

Call 780 414-0064 to get a 24/7 Web Technician "On duty all the time"

With the 24/7 Web Technician on Duty, you could get advanced notification of the next:

- Boiler failure
- Cold shower
- Sewer backup
- Pin hole leak
- Seized pump
- Broken AC unit
- Stuffy hallway
- Noisy fan
- Frozen radiator
- Power failure
- Freon leak
- Flame failure
- Air lock
- Plugged filter
- Steam leak

So you can have a technician onsite before the first complaint comes in.
